

Adjustable markilux spotlights in the front profile

markilux 6000 with spotlighting

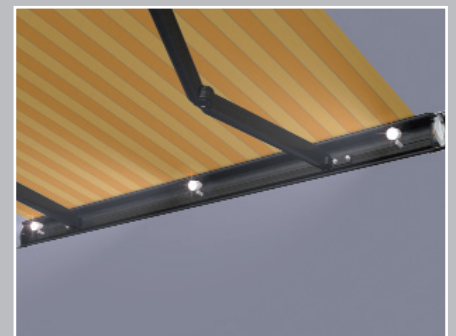

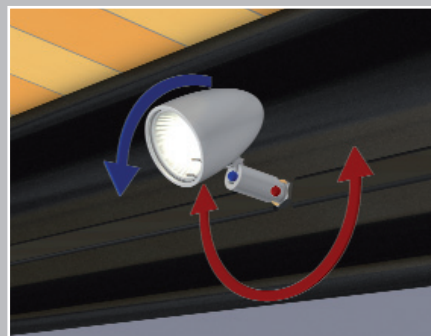

Impressive, accentuated lighting for balconies and patios – enjoy summer evenings long after the sun has set. markilux spots, adjustable halogen lighting in the front profile.

- Attractive markilux spots from the design studio, in a silver aluminium finish
- The individual spotlights are installed in and protected by the front profile and can be individually adjusted
- Depending on the width of the awning, 2 to 6 adjustable markilux spots provide a pleasant level of light
- Low energy consumption due to low-volt technology
- High light intensity with 20 Watt OSRAM halogen reflector lamps
- One or two markilux safety transformers (degree of protection IP 68) are unobtrusively installed and protected within the markilux 6000 cassette

- markilux spots can also be combined with a markilux shadeplus
- markilux spots and markilux heaters perfectly complement each other to make evenings under your markilux awning even more enjoyable
- Convenient light control – remote controlled dimmer for optimum lighting levels. Convenient remote-control operation with markilux hand-held transmitter at the push of a button, available as optional extra
