

Markilux Syncra – creating more shade

THE new free-standing awning system, the Syncra- yet another sun shading innovation has been launched by German manufacturer Markilux.

This extremely strong free-standing powdercoated steel structure supports dual awnings which can cover up to 56m² per unit or custom build up to three Syncra systems to provide coverage up to 168m².

The Syncra frame can be set into concrete or bolted down for future re-location. The two awnings can be operated separately for partial coverage.

Offering all year sun and rain protection using the exclusive Markilux Sunsilks SNC or Perla FR fire retardant fabrics, the Syncra is the ideal for outdoor entertaining areas in residential homes and large commercial spaces including child care centres, cafés, restaurants, pubs and outdoor market areas.

Accessorize your Syncra with side wind break screens, extendable valances, integrated guttering, sun and wind sensors, infrared heaters, lighting and sound systems – markilux – smart awnings, smart solutions.
